

**SUMMARY**

Experienced Data Analyst known for achieving an 85% reduction in project timelines, consistently exceeding accuracy standards. Proficient in data integration and reporting, I've streamlined cross-functional collaboration and project management using tools like Jira and Qlik. My expertise includes data extraction, transformation, and visualization through Python, SQL, and VBA.

**WORK EXPERIENCE****1. Exponentia AI****June 2024 – Present***Business Intelligence Engineer*

- Revamped and Optimized QS data model, reducing processing time from 18 hours to 8 hours enhancing efficiency and scalability
- Supported Nprinting tasks and created Custom Nprinting reports and task ensuring timely and accurate report delivery.
- Revamped HR, Operations and Finance report by implementing data validation and testing process, ensuring accuracy and reliability in data insights.

**2. Crimson Interactive – Mumbai (IN)****March 2022 – May-2024***Business Intelligence Developer*

- Acted as the Single Point of Contact (SPOC) for critical reports, ensuring effective monitoring, enhancing KPIs, and establishing strong client relationships in line with compliance standards.
- Fostered strong cross-functional collaboration, resulting in recognition as a "Rising Star" for exceptional project performance and the ability to handle disputes in an Agile environment.
- Employed Jira to manage multiple tickets and projects, demonstrating the ability to meet deadlines, enhance productivity, and manage tasks under Agile methodologies.
- Enabled team efforts by developing a client behavior and churn analysis dashboard, expediting strategic decision-making and further strengthening client relationships through advanced analytics.
- Collected requirements from key stakeholders and coordinated the creation and execution of tailored dashboards, fostering data-driven decision-making throughout the organization and contributing to improved decision-making.
- Teamed up with Software Engineers to extract and transform data from databases, showcasing adaptability and collaborative skills in an Agile development environment.
- Resolved data flow issues, conducted unit testing, and documented ETL and reporting processes with precision, showcasing problem-solving expertise in BI and analytics.

**3. eClerx – Navi Mumbai (IN)****March 2021 – March 2022***Data Analyst*

- Converted raw data into actionable insights, employing robust Data Warehousing principles and executing Extract, Transform, Load (ETL) processes in Qlik and Tableau. This enhanced data transformation facilitated meaningful information for strategic decision-making.
- Established and tracked key performance indicators (KPIs) for existing and new functional projects in Qlik and Tableau, utilizing integrated Data Warehousing solutions to ensure alignment with organizational goals.
- Demonstrated proficiency in end-to-end Data ETL processes, leveraging tools like Qlik, Tableau, Python, and SQL. This included data extraction, transformation, and loading for comprehensive visualization and analysis.
- Streamlined the data cleaning process using Python and VBA within the context of Data Warehousing best practices, ensuring high-quality data for incorporation into Qlik and Tableau dashboards.

**EDUCATION****MUMBAI UNIVERSITY, MECHANICAL ENGINEERING, MUMBAI****June 2016 – October 2020**Bachelor of Technology in Mechanical Engineering

---

**SKILLS & INTERESTS**

- Technical: List Python, SQL, Power BI, Tableau, Qlik Cloud, Excel, Advance Excel, DAX, Snowflake, Data warehousing, Data modelling, ETL, Pattern and trend identification.

**Certifications**

- Tableau Desktop Specialist
- Microsoft Certified: Fabric Analytics Engineer Associate
